

INDUSTRIAL VENDING

Page 1

If you are frustrated with the cost or abuse of consumables/products in your company, the **Dispenstech Smart Store** is definitely the solution for you.

Consumables/products include everything you currently use in your workshops that you could save money on (i.e. PPE, workshop tools and consumables, etc.)

The heart of **Dispenstech Solutions'** value proposition is our ability to stock products/consumables you currently use and supply them in ways that saves you time and money.

This system is revolutionising the industrial industry, helping thousands of businesses drive productivity and cost savings.

We are confident that you won't find a more complete, cost effective solution on the market.

To us it is all about adding value and driving growth through customer service.

Talk to us to find the right vending solution for your specific requirements.

Dimensions: H 1840mm x W 1065mm x D 830mm

Weight: 380kg

Power: 220 V, 3.5 Amps, 700 Watt

Capacity: 60 Selections

FEATURES

- The access system currently in use on site is linked to the vending machines. Therefore no extra cards are issued as the employees will use their existing clock cards or fingerprints.
- The client is able to configure settings and add employees to the database via the network from his desktop.
- The client has the ability to program or assign employees via the network to either one specific vending machine or all vending machines.
- The client can create certain groups and assign products and employees to these groups. These employees will then be limited to vend specific products used by this group only.
- The client can limit the number of products per employee. These limitations will then automatically pertain to all vending machines. In other words, if the employee received a product from one machine, he will not be able to go to another machine and vend the same product if he is limited.
- The client can also allow the employee(s) to exceed his limits for certain important PPE products. The client can then access a report that will provide details on who exceeded their limits.

WHY VENDING

- Vending gives you the best of both worlds: immediate access along with complete accountability.
- Eliminate tedious paperwork, stock-outs and no need for you to carry excess inventory.
- It is a great tool for job costing and it enables our customers to dramatically reduce consumption and abuse, simply because employees know they are accountable for what they use.
- Plug in and start saving at least 30%
- No more tracking down supervisors, travelling to remote storerooms, or handing out repetitive items.
- Increase productivity by making products available 24/7 at the point of use – employees can self serve and get back to the job in a matter of seconds.
- Although the product is easily accessible, every transaction is controlled and tracked.
- Complete control over the issuing of items – who may vend and how often.
- The level of control in reporting is completely up to you.
- View detailed usage data to drive continuous improvement – full and flexible management reporting available.
- The **Dispenstech Smart Store** ensures that your employees have the right products at their fingertips.
- When inventory runs low, the person responsible for refilling the **Dispenstech Smart Store** receives an automated alert to refill.
- It is hard to imagine a more efficient supply process.

WHY DOES RENTAL MAKE SENSE FOR YOUR COMPANY?

- Machines of the best quality currently available on the market.
- Maintenance cost, including parts, labour and transport in Gauteng shall be carried by **Dispenstech Solutions** for the duration of the agreed contract period, provided that the customer complies with the provisions of the Rental Agreement.
- Upgrade and replacement of the **Dispenstech Smart Store** after end of life or as newer technology becomes available.
- Prices will be fixed for the duration of the contract term, no escalation.
- No hidden fees.
- Backup machines will be available for exchange.

WHY DISPENSTECH

Dispenstech Solutions were the first company to introduce industrial vending to the South African market after years of extensive research. We invested a lot of time and resources to adapt the concept for the South African market and to ensure that each client's specific requirements can be met. The access system currently in use on site is linked to the vending machine(s). Therefore no extra cards are issued as the employees will use their existing clock cards and/or fingerprints. We believe that we have the ideal solution for companies who want to save money and curb abuse.

Our software was specifically developed for the South African market whereas other suppliers use standard cashless payment systems on their machines and therefore have to issue additional cards to employees for use on their machines.

Our professional approach to the vending market, range of equipment, as well as our specialized technical back-up and support ensures us being the only company that can supply a complete turnkey solution to your industrial vending needs.

- We import our own machines.
- Every **Dispenstech Smart Store** is customized to meet each customer's unique product needs and tested to ensure trouble free vending of those items.
- **Dispenstech Solutions** supply the machines, card readers and software to operate and manage the **Dispenstech Smart Store**.
- Our installation team delivers and install the vending machine and provide on-site training.
- **Dispenstech Solutions** is responsible for all technical maintenance of the machines.
- Our technicians are available to do upgrading, maintenance, repairs and servicing when required within 24 hours.
- Flexible Reporting – the level of control in reporting is completely up to the customer.
- A full audit report is available on every machine at any time.
